

**2. Contador con Bucle for:** Programar un script que use un bucle for para contar del 1 al 10 y mostrar cada número en consola.

The screenshot shows a web development IDE with three panels: HTML, CSS, and JS. The JS panel contains the following code:

```
1 let i;  
2  
3 for (let i = 1; i < 11; i++) { console.log(i); }  
4
```

The console panel below shows the output of the script, displaying the numbers 1 through 10 on separate lines.

```
let i;
```

```
for (let i = 1; i < 11; i++) { console.log(i); }
```
